

David H. Snyder Museum of Zoology (APSU 19192, "lead morph" individual). New county record (Redmond and Scott 1996. Atlas of Amphibians in Tennessee. Misc. Publ. No. 12, The Center for Field Biology, Austin Peay State University, 94 pp. Internet version with links to new records since 1996 available at <http://www5.apsu.edu/amatlas/index.html> [accessed 9 July 2012]).

**DAVID HEDRICK**, Chattanooga Zoo, 301 North Holtzclaw Ave., Chattanooga, Tennessee 37404, USA; e-mail: d.hedrick@hotmail.com.

**PSEUDOBRANCHUS AXANTHUS BELLI** (Everglades Dwarf Siren). USA: FLORIDA: PALM BEACH Co.: J. W. Corbett WMA (26.844°N, 80.315°W; WGS 84). 5 April 2012. Joshua Young, Joshua Holbrook, Brett Bartek, and Melissa Dolinsky. Verified by Kenneth Krysko. Florida Museum of Natural History (UF 166813). New county record (Krysko et al. 2011. Atlas of Amphibians and Reptiles in Florida. Final report, Project Agreement 08013, Florida Fish and Wildlife Conservation Commission, Tallahassee, Florida. 524 pp.) Nearest known records are from St. Lucie Co. to the north and Miami-Dade Co. to the south. Several dozen individuals were observed in shallow marshy pond habitat with approximately 4–6 inches of peat above a sand substrate. The ponds are temporary, and lack predatory fish. Individuals were collected with a dip net while kicking up mounds of peat. Individuals were also seen swimming in open water between 2130 h and 0530 h. A second population (10 individual observed; UF 167203) was found on 12 June 2012 at Grassy Waters Preserve (26.82955°N, 80.18589°W; Palm Beach Co.).

**JOSHUA D. HOLBROOK**, Department of Biological Sciences, Florida Atlantic University, Davie, Florida 33314, USA (e-mail: JHolbro8@fau.edu);

**JOSHUA YOUNG, BRETT BARTEK, and MELISSA DOLINSKY**, Palm Beach Zoo, West Palm Beach, Florida 3340, USA.

**SIREN INTERMEDIA** (Lesser Siren). USA: VIRGINIA: DINWIDDIE Co.: Petersburg National Battlefield (PETE), Five Forks Battlefield, 6.4 km SW Sutherland (37.153581°N, 77.614917°W; WGS 84). 26 August 2003. J. C. Mitchell, C. T. Georgel, E. J. Latham, C. d'Orgeix, J. Jeffries, and T. Blumenshine. Verified by Kenneth L. Krysko. Florida Museum of Natural History (UF 167206). New county record (Mitchell and Reay 1999. Atlas of Amphibians and Reptiles in Virginia. Virginia Dept. of Game and Inland Fisheries, Richmond, Virginia. Spec. Publ. 1. 122 pp.). This site is 25 km SW of the nearest known location in Prince George Co. Extends the range of *S. intermedia* approximately 17 km into the Piedmont Physiographic Province. One individual with 35 costal grooves was caught in a minnow trap and released in a heavily vegetated beaver pond.

Field work was supported by a contract from the National Park Service and conducted by permits from the NPS (PETE-2002-SCI-003).

**JOSEPH C. MITCHELL**, P.O. Box 2520, High Springs, Florida 32655, USA; e-mail: dr.joe.mitchell@gmail.com.

#### ANURA — FROGS

**ACANTHIXALUS SPINOSUS** (African Warty Tree Frog). GABON: OGOOUÉ-IVINDO PROVINCE: Ivindo National Park, W of Ipassa Research Station (0.511089°N, 12.801772°E, WGS84; 538 m elev.). 7 April 2010. P. Carlino. Museo di Storia naturale del Salento, Calimera (MSNS-Amph 03). Verified by A. Durante (MSNS). SVL 32.2 mm. At night, on leaf, 1 m above forest floor. First record for Ivindo National Park and Ogooué-Ivindo Province. Closest documented record in Gabon is in Moukalaba-Doudou National

Park, Ogooué-Maritime Province, ca. 380 km SW of Ipassa (Pauwels and Rödel 2007. Herpetozoa 19:135–148).

We thank Daniel Franck Idiata, Aurélie Flore Koumba Pambo (CENAREST, Libreville), Auguste Ndoutoume-Ndong (IRAF, Libreville), Alfred Ngomanda (IRET), Joseph Vivien Okouyi Okouyi (Ivindo National Park), and Antonio Durante (MSNS) for providing research and collecting permits.
