

**NYCTIXALUS PICTUS** (White-spotted Tree Frog). THAILAND. NAKHON SI THAMMARAT PROVINCE: KHAO LUANG NATIONAL PARK: Khao Luang (ca. 8°27'N, 99°37'E). No date. M. Matsui. Graduate School of Human and Environmental Studies, Kyoto University (KUHE 19435). Verified by J. Nabhitabhata. Single adult. RANONG PROVINCE: Muang District: forest stream near Klong Hat Som Paen (ca. 9°57'N, 98°41'E). 9 January 2003. C. Chimsunchart, M. Sumontha, and O.S.G. Pauwels. Institut Royal des Sciences naturelles de Belgique, Brussels (IRSNB 13241). Verified by C. Chimsunchart. Single adult, found at 2235 h on a shrub along the water, 1.5 m above the ground. First records for both provinces. The closest records in Thailand are from Raman Forest Park (Pauwels et al. 2000. Abstracts. Fourth Asian Herpetological Conference. 16–20 July 2000, Chengdu, China: 137; voucher specimen in Muséum National d'Histoire Naturelle, Paris) and Laem Hin Chang (Grossmann and Tillack 2000. Sauria 22[4]: 23–38), Phang-Nga Province, southern Thailand. The locality in Ranong Province is situated at ca. 145 air km N of the previous northernmost locality for *N. pictus* in mainland Southeast Asia, and less than 20 air km from Myanmar, where the species has not yet been recorded.

We thank C. Chimsunchart (Phetchaburi), A. Aowphol and K. Thirakhupt (Chulalongkorn University, Bangkok), and G. Coulon and G. Lenglet (IRSNB) for help and working facilities.

Submitted by **OLIVIER S. G. PAUWELS**, Department of Recent Vertebrates, Institut Royal des Sciences naturelles de Belgique, Rue Vautier 29, 1000 Brussels, Belgium (e-mail: osgpauwels@hotmail.com), **MONTRI SUMONTHA**, Ranong Marine Fisheries Station, 157 M. 1, Saphan-Pla Rd., Paknam, Muang, Ranong 85000, Thailand (e-mail: montri\_sumontha@hotmail.com), and **MASAFUMI MATSUI**, Graduate School of Human and Environmental Studies, Kyoto University, Sakyo, Kyoto 606-8501, Japan (e-mail: fumi@zoo.zool.kyoto-u.ac.jp).

**OSTEOCEPHALUS BUCKLEYI** (Buckley's Slender-legged Treefrog). PERÚ: MADRE DE DIOS: Manu: Río Los Amigos Conservation Concession, Río Los Amigos Research Center (12°34'S, 70°06'W, 270 m elev.). 14 February 2002, 10 March 2003, 1 April 2003. R. von May, N. Carrillo. Museo de Historia Natural Universidad San Marcos, Lima, Perú (MHNSM 19225, male 39.8 mm SVL; MHNSM 19226, male 38.6 mm SVL; MHNSM 19227, female 50.9 mm SVL. Collected between 2000 and 2400 h, on understory vegetation 0.6–1.4 m above ground, in an old-growth tierra firme forest ca. 2.5 km N and 3.5 km NW from research center.). Verified by K.H. Jungfer. First record for Madre de Dios Department and second record for southern Perú (Rodríguez et al. 1993. Publ. Mus. Hist. Nat. UNMSM [A] 45:1–22; Duellman and Thomas 1996. Occas. Pap. Mus. Nat. Hist. Univ. Kansas 180:1–34; Trueb and Duellman. 1971. Occas. Pap. Mus. Nat. Hist. Univ. Kansas 1:1–47). The nearest known localities in Perú are: Balta, Ucayali Department (ca. 300 km NW) (Duellman and Thomas 1996, *op. cit.*) and Yahuaramayo, Puno Department (ca. 150 km S) (Trueb and Duellman 1971, *op. cit.*). This record fills a hiatus of ca. 450 km in the southwestern region of the known range for this species. This includes the periphery of the Amazon Basin in the Guianas and northeastern Brazil, as well as part of the Amazon Basin in southern Colombia, Ecuador, Perú, and east-

central Bolivia (Trueb and Duellman 1971, *op. cit.*).
